

**Status:** Open to all participants

**Venue:** Knowledge Corner

**Date:** Monday, 18 March 2019

**Exhibit 1** (09:00 – 13:00): Power Shift

- **Organizer:** Ghana Youth Environmental Movement (GYEM)
- **Objective:** To raise awareness on the renewable energy potential on the African continent and highlight ongoing campaign efforts to address energy poverty on the continent, and work towards achieving the goal of the Paris Agreement

GYEM is a leading youth-led environmental movement in Ghana whose vision is to organize people to campaign for a sustainable environment and a just world for the current and future generations.

The exhibit will display posters to give out information on the campaign, and flyers giving out key statistics of the energy situation in Africa.

**Exhibit 2** (13:30 – 17:30): Youth Innovations for Low Carbon Development and Climate Resilience in Africa

- **Organizer:** Africa Youth Initiative on Climate Change (AYICC)
- **Objective:** Showcase youth actions and best practices for climate change mitigation and adaptation

The Africa Youth Initiative on Climate Change (AYICC) is an umbrella network of youth organizations working on climate change with 45 National Chapters and over 20,000 membership across the continent. AYICC has been consistent in building capacities of youth through its flagship program Africa Youth Conference on Climate Change (AFRIYOCC) and mobilizing youth Actions to address threats of climate change on the continent.

The exhibition will include the display of AYICC banner and sharing of flyers, posters and information briefs about AYICC and guidelines on membership. Reports on AYICC activities as well as books with youth actions and best practices will also be distributed.
